## Paul Davis Restoration & Remodeling

If your residential or commercial property is damaged by a storm, fire or water, Paul Davis Restoration & Remodeling is there to help.

"Unfortunately, these disasters happen," says Dan Driscoll. "We're there to help in the recovery process, and that's what makes our business rewarding."

Part of a 42-year-old national company with 225 locally franchised offices, the Greer company services the Upstate with a team of 21 employees. Using its 6,000-square-foot facility near the GSP airport, Paul Davis provides emergency services, cleaning, drying, and rebuilding of damaged property and contents. The company also offers traditional remodeling. In operation since 1987, the company continues to grow, adding staff and the latest technologies and equipment to serve Upstate property owners. "Ultrasonic cleaning, soda blasting, ozone treatment rooms and Inject-i-dry are just a few of the high-tech systems we employ to offer the optimum restoration outcome," says Gordon McPhee.

Owners Gordon McPhee and Dan Driscoll pair respective financial and engineering backgrounds to form an effective leadership team. Both have grown children and interests in physical fitness and dogs – including Piper, Driscoll's miniature labradoodle who frequents the office.
